

## HTML, CSS, JavaScript & React Interview Questions (Corrected)

### HTML

#### 1. What are semantic HTML tags?

Semantic HTML tags provide meaning to the content they wrap, such as header, footer, article, and section.

#### 2. What is the article tag used for?

It is used for self-contained content like blog posts or news articles.

### CSS

#### 1. What are CSS selectors?

CSS selectors are used to target HTML elements for styling.

### JavaScript

#### 1. What is the DOM?

The DOM represents the HTML document as objects so JavaScript can manipulate it.

### React

#### 1. What is React?

React is a JavaScript library for building reusable user interfaces.
